Half-Day Virtual IT Event

[RSVP NOW](#)

Get Proactive.

Get VMware Skyline.

You will be taken to a screen that looks like this:

Click “By Product”, then “Fusion 11”

-----

After setting up the VM If you encounter these pop-ups:

Just close VMware Fusion, reopen, then try launching the VM again.

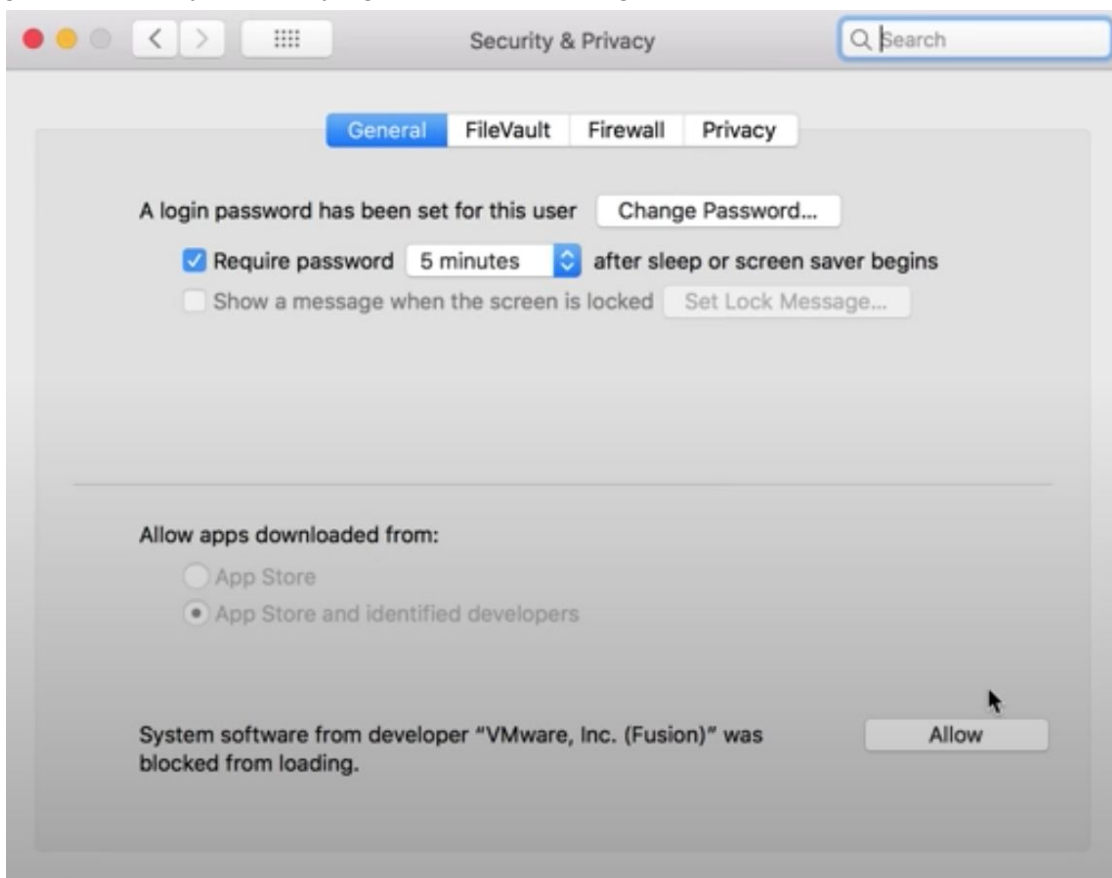

If that doesn't work go to your System Settings/General

Then to Security & Privacy

Under the General Tab in Security & Privacy you will see this message at the bottom:  
"System software from developer 'VMware, Inc. (Fusion)' was blocked from loading."  
Click the Allow button next to it. (If this message did not appear, then restart your computer and go into Security & Privacy again and the message should now be there).

Don't forget to unlock (bottom left) so you can click the "Allow" button.
