

# Topics tonight

- Terminology in job interviews
- Update on changes to next cohort curriculum (thank you for your input!)
- Schedule for rest of class
- Help over the holidays
  - I am traveling next week but may be able to look at issues that come up for you (slack me details and a link to the repo (with your most recent code). After 12/27, I can meet as needed by appointment.
- What to expect on Demo Day + sign ups (podcast and table placement)

# Capstone Check-ins on Saturday – what we'll be looking for

## GitHub Repository with *substantial* (not necessarily final) README.md

- it's okay if capstone is part of the name, but your repo should have a subject specific name
- please slack me your capstone repo link so I can add it to the class website (also any final changes to anything else on the website)

## Agile Standup style check-in

- what has been done
- what is planned next
- any impediments

# Schedule for rest of class

Saturday, December 21 – capstone check-ins

Thursday, January 2 – should be working on presentations / some soft demos if people are ready  
**building will open at 5 pm**

Saturday, January 4 – all remaining soft demos

Tuesday, January 7 – demo revisions as needed/requested

Thursday, January 9 – Demo Day

# **Before Demo Day**

- Survey from Jeremiah (monitor needs + data for info sheet) - tomorrow
- Podcast sign up - tonight
- Location sign up - tonight
- Print 30-40 one sheets (one page about you & your project w/ headshot)

# Demo Day

- Goals
  - Primary goal – conversations + make connections
  - Get contact info (name, LinkedIn, email address)
  - Try to relax and enjoy it 😊
  - Show off your hard work
    - Capstone project first
    - Polish and be prepared to show one or two samples of other work if asked
- Attendees
  - RSVPs are requested but not reliable indicator!
  - Potential employers
  - People curious about the program
- Friends & Family are welcome! Might want to aim for 6:45 if they want to stay for graduation.
- Graduation

# After Demo Day

- Send follow-up messages to people
- Take a couple of days off (you've earned it!)
- Begin / continue your job search (watch the jobs google group for postings and search on your own)
- Keep practicing what you've learned and polishing your work in GitHub – this keeps you sharp and fluent about tools and techniques
- Connect with people you've met and go to meetups to connect with more
- Develop a mentor relationship
